

TO WHOM IT MAY CONCERN

We have recently started using the School Bytes program for emailing Statements of Account to our 350 families. What a wonderful program this is! The number of administration hours saved by not having to print, fold and mail these statements every term has well and truly paid for our investment in this program. Not only that, reprinting and looking up statements is far quicker and easier than via ebs4. The choice to email to one family or to one group is extremely handy and a feature we use often.

Blake Garrett, Founding Director has been amazing through the whole process, from introducing the program to us, to visiting the school to help with set up and answering any questions we had. He is extremely professional and has an in depth knowledge of how schools work.

The program is super easy to use and Blake is always available via email and phone, if we have any questions. In reality the Knowledge Base / User Guide has answered the few questions we've had.

Please feel free to contact me if you have any questions about Blake or his company.
